

For Immediate Release

Analytic Systems Wins SeaARK Contract

Surrey, BC, Canada. May 30, 2006. SeaARK Boats has awarded Analytic Systems the first orders for a COTS militarized voltage converter, VTC1015mil-24-12, for SeaArk's Model 34' RAM. This 24 VDC to 12 VDC voltage converter is specifically modified to meet the rugged conditions the 34' workboat will find itself in. SeaArk's contract is for the USCG.

SeaArk Boats is one of America's finest workboat manufacturer's. They produce a full line of workboat and patrol boats.

In addition, Analytic Systems has also recently received a contract from Aluminum Chambered Boats, Inc., of Bellingham, Washington for the VTC1015mil-24-12, for its BEB project for the US Marine Corps. This will be for a minimum 62 Boats over a 1 1/2 to two year contract. This voltage converter is built with special filtering to reduce EMI noise to an absolute minimum which is best for running electronic equipment. The line of Analytic Systems voltage converters is designed for rugged conditions and can be ruggedized further for military requirements using the "mil" package.

Analytic Systems, of Surrey, B.C., Canada, (www.analyticsystems.com) manufactures a wide range of high performance Power Conversion products including AC and DC source battery chargers, DC to DC voltage converters, AC to DC power supplies and DC to AC inverters. Over 65% of its business is for the US Military but they also focus on other high end markets: Commercial Marine, Industrial, Alternative Energy and Telecom applications, throughout North America and around the world.
