Series FCSS Single Phase

The FCSS Series is a highly compact AC/AC frequency converter. Suitable for a wide range of applications, the FCSS features full electronic protection, high efficiency and low output noise. Well established design techniques are used to ensure high reliability. The converter is cooled by a built-in fan. Extended operating temperature (-40 to +65°C) is available.

Series FCVS Variable AC Power

The FCVS Series is a variable AC power source designed to deliver power at a selectable frequency between 47Hz to 410Hz. The unit uses PWM technology and generates a pure sine-wave output with typical distortion of less than 5%. The output voltage is continuously adjustable from 0 to full scale. The FCVS Series AC power source can be used as a compact AC/AC frequency converter, suitable for a wide range of applications. It features full electronic protection, high efficiency and low output noise. The unit is fan cooled.

Series FCST Single to 3-Phase

The FCST Series AC/AC frequency converter provides 3-phase power from a single-phase line outlet. The standard unit delivers 3-phase outputs of 208rms, 380Vrms or 415Vrms (PH-PH) continuous at 50, 60, or 400Hz. The floating outputs are isolated from each other and can be connected in a 'Y' configuration or left as three individual outputs. In 'Y' configuration, the centre point (neutral) can be grounded. The FCST can be shut down electronically by a control switch on the front-panel of the unit. A remote shut-down option is also available. The unit features full electronic protection, high efficiency and low input and output noise.

Series FCTT 3-Phase to 3-Phase

The FCTT Series AC/AC frequency converter provides 3-phase power from a 3-phase line outlet. The standard unit delivers 3-phase outputs of 208rms, 380Vrms or 415Vrms (PH-PH) continuous at 50, 60, or 400Hz. The floating outputs are isolated from each other and can be connected in a 'Y' configuration or left as three individual outputs. In 'Y' configuration, the centre point (neutral) can be grounded. The FCTT can be shut down electronically via a control switch on the front-panel of the unit. Remote shut-down and output voltage adjustment options are available. The unit features full electronic protection, high efficiency and low input and output noise.

Benefits

- Ultra-Quiet
- Power sensitive electronics without interference
- Rugged & Reliable
- Ensure years of safe and trouble free operation

Features

- Input is filtered to EN 55022 Class A
- Compact size, light weight
- Sinusoidal wave shape
- Output power up to 12'000 Watts
- Full electronic protection
- High reliability
- Telecom quality
- Field-proven design topology

Features Series FCVS only

- Variable output voltage & frequency
- Digital meters for Vrms & frequency
- Isolated, floating output

Applications

- Test Facilities
- Marine / Automotive / RV
- Electric Utilities and Substations
- Telecom Power Plants
- Manufacturing Locations
- Steel Mills
- Military Applications (COTS)
- Industrial Controls
- OEM Applications
- Solar / Alternative Power Systems
- Fuel Cells

Options

- Input voltage: custom
- Inverter Fail Alarm, Form C contact
- 19" rackmount for all models
- Wide temperature (-40° C operation)
- Ruggedization Package (against shock and vibration)
- Conformal coating (dusty, humid, salty conditions)
