Sinewave Inverter

Series UPSW2000HV

Description

The model UPSW2000HV pure sinewave inverter supplies a 230VAC output voltage either from a 110V or 220VDC power source. The shape of the output voltage is pure sinewave - as from the grid.

All new High Frequency Switching Design offers high power and reliability in a compact package and light weight. Extra input and output filtering reduce EMI to extremely low levels. Reliability features include an input fuse, thermal shutdown, current limiting and output short circuit shutdown with automatic recovery.

The input and output is fully isolated.

The superb overload capability supplies short time peak power to start heavy equipment such as pumps and compressors.

It is equipped with a power save circuitry using the auto sense method to detect a load connected to the output. The unit is equipped with an automatic bypass function < 6ms.

Optional: Remote Control

Ruggedizing (against shock and vibration)
